Personal Profile

Past: From 2017 -2020 I completed a #BTEC course in Mechanical Engineering at Uxbridge College, obtaining a MMM grade. From late 2021 to late 2024 I worked as a Logistics and Warehouse assistant in Transputec, dealing with deliveries and ensuring companies/individuals got their products.

After my time in Transputec, I was suggested by a superior to join JustIT, where I started out in the Level 2 course in Digital and IT Skills for Just IT for the entirety of October 2024 and early November. I successfully obtained a L2 diploma.

Present: After a month hiatus. I was finally enrolled into Level 3 Software Development Skills Bootcamp, in which I spent the past 3 months learning different coding languages. Including HTML, CSS, JavaScript, Python & SQL. All for the sake of building my own portfolio of various projects utilising the tools that were given to me.

Future: Once this Bootcamp is over, I'll continue to work with coding languages to create a library of unique projects while looking to work as a junior developer, as I require more guidance and helpful hands to help me further understand what it means to be a software developer.

Key Skills

Technical Skills

Graphic Design:

I'm experienced in using softwares such as Clip Studio Paint and Aseprite, both of which are softwares that I use to design characters and backgrounds.

Microsoft:

I've used Microsoft Word, PowerPoint & Excel for as long as I can remember. I've recently used this softwares throughout the 4+ weeks of L2 JustIT, for databases, presentations and documents.

Visual Studio Code:

The main tool I've used in the 3+ months of learning coding languages, including HTML, CSS, Python and JavaScript. I'm quite familiar with how each of the languages work and managed to produce a few simple but effective projects in the timespan.

Soft Skills

Teamwork:

My time in Transputec forced me to work alongside other co-workers in order to get the job done. I'm capable of working with others and contributing my efforts as long as it produces results in the long-run.

Communication:

I believe myself to be capable of communicating with others, whether it's receiving or giving out instructions, especially since my previous line of work required me to follow certain instructions to avoid any mishaps from occurring in the long run.

Dependability:

When responsibility is pushed upon me, I ensure that whatever task or deadline given to me is completed to the best of my abilities. I want to ensure that the trust given to me by others is not taken for granted.

Training and Education

12/2024-Present

Just IT Training Ltd, London

Digital Skills Bootcamp: Software Development

A twelve-week intensive bootcamp covering the fundamentals of Software Development.

- Development of HTML
- Introduction to HTML/JavaScript/CSS
- Developed a web-based product
- Database design
